

<b>Título</b>	Studies in the development of a continuous process for the extraction of essential oils using microwaves	
<b>Alumno</b>	Alexander Navarrete	
<b>Fecha</b>	16 Junio 2010	
<b>Director</b>	M J Cocero y Rafael B. Mato Chaín	
<b>Mención</b>	Doctorado Europeo	
<b>Estancias</b>	3 meses en 2007 en el National Centre for Industrial Microwave Processing (NCIMP), Faculty of Engineering, University of Nottingham, University Park, Nottingham, NG7 2RD, UK	
<b>Financiación estancia</b>	Universidad de Valladolid	
<b>Contribuciones derivas de la Tesis</b>		
<b>Título</b>	<i>Valorization of solid wastes from essential oil industry</i>	
<b>Autores</b>	Navarrete, A., Herrero, M., Martín, A., Cocero, M.J., Ibáñez, E.	
<b>Revista</b>	<i>Journal of Food Engineering</i> (2011, In press, doi: 10.1016/j.jfoodeng.2010.10.033)	
<b>Citas: 2</b>	<b>Índice Impacto: 2.313</b>	<b>Orden/Total: 22/128 (Ingeniería Química)</b>
<b>Título</b>	<i>Measurement and estimation of aromatic plant dielectric properties. Application to low moisture rosemary</i>	
<b>Autores</b>	A. Navarrete, R. Mato, G. Dimitrakis, E. Lester, J.R. Robinson, M.J. Cocero, S. Kingman	
<b>Revista</b>	<i>Industrial Crops and Products</i> (2011, accepted, doi:10.1016/j.indcrop.2011.01.012)	
<b>Citas:</b>	<b>Índice Impacto: 2.103</b>	<b>Orden/Total: 3/11 (Agricultural Eng.)</b>
